Contents

1	Introduction	2
2	Overview of Supervised Learning	3
3	Linear Methods for Regression	4
4	Linear Methods for Classification	5
5	Basis Expansions and Regularization	6
6	Kernel Smoothing Methods	7
7	Model Assessment and Selection	8
8	Model Inference and Averaging	9
9	Additive Models, Trees, and Related Methods	10
10	Boosting and Additive Trees	11
11	Neural Networks	12
12	Support Vector Machines and Flexible Discriminants	13
13	Prototype Methods and Nearest-Neighbors	14
14	Unsupervised Learning	15
15	Random Forests	16
16	Ensemble Learning	17
17	Undirected Graphical Models	18
18	High-Dimensional Problems: $p \gg N$	19

1 Introduction

2 Overview of Supervised Learning

3 Linear Methods for Regression

4 Linear Methods for Classification

5 Basis Expansions and Regularization

6 Kernel Smoothing Methods

7 Model Assessment and Selection

8 Model Inference and Averaging

9 Additive Models, Trees, and Related Methods

10 Boosting and Additive Trees

11 Neural Networks

12 Support Vector Machines and Flexible Discriminants

13 Prototype Methods and Nearest-Neighbors

14 Unsupervised Learning

15 Random Forests

16 Ensemble Learning

17 Undirected Graphical Models

18 High-Dimensional Problems: $p \gg N$
